OBJECTIVE

Motivated MCA graduate seeking an entry-level Python Developer role where I can apply my skills in Machine Learning and Web Development to build real-world applications and contribute to organizational growth.

EDUCATION

Master of Computer Application (MCA)	2023-2025
University BDT College of Engineering, Davanagere	Davanagere, India
Percentage: 83%	
Bachelor of Science (Computer Science)	2020-2023
Govt. First Grade Women's college, Davanagere	Davanagere, India
Percentage: 73%	

TECHNICAL SKILLS

- | | |
|--------------------------------|---|
| • Packages | Microsoft Office (Word, Excel, PowerPoint) |
| • Programming Languages | Java, Python, Node.js |
| • Web Technologies | HTML, CSS, Bootstrap, JavaScript, React |
| • Frameworks | Django, Flask |
| • Databases | MySQL, SQLite, MongoDB |
| • Developer Tools | PyCharm, Anaconda, Visual Studio Code, Git/GitHub |

INTERNSHIP/ EXPERIENCE

Python Programming Intern UBDTCE, Davangere	Dec 2024 – Mar 2025
--	----------------------------

- Trained in Python fundamentals and Programming logic
- Learned core Python concept: variables, loops, functions, and OOP

- Worked on Basic python programs and developed simple mini projects using python
- Gained practical experience in logical thinking, problem-solving and debugging

CERTIFICATES

Cloud Computing Certificate (NPTEL)

Ethical Hacking(MOOC)

Full Stack Development Masterclass Certificate (Novi Tech Pvt. Ltd)

PROJECTS

- **P-HMR (Personalized-Healthcare and Medicine Recommendation) system using ML:** Developed a system that recommends medicines, predict disease based on symptoms using supervised ML algorithm.
Tech Stack: Python, Flask, SciKit-learn, Pandas, HTML, CSS, SQLite
Live Demo: <https://phmr-system.onrender.com>
GitHub: <https://github.com/RamyaSRevankar/P-HMR-System>
- **Fake and Real News Prediction using Machine Learning:** Built a classification model to identify fake vs. real news articles using Python, NLP techniques, and ML algorithms such as Logistic Regression and Naïve Bayes.
- **Jewellery Shop Web Application-Python, Django:** Built a full-stack e-commerce application with product catalogue, cart, and order management. Implemented secure authentication and an interactive user interface.

EXTRA-CURRICULAR ACTIVITIES

- Published a research paper titled ‘P-HMR (Personalized-Healthcare and medicine Recommendation) System using ML’ in the IJISRT Journal, focusing on applying machine learning algorithms for disease prediction.
